

IS RODNEY COOPER A NUT?

Rodney Cooper

TUNE TO 2GN DAILY

AT 4PM FOR HOP
HARRIGAN

Emminent SE2 public figure, Rodney Cooper, has apparently cracked under the severe stresses of the recent examinations.

Over the past few weeks, this previously sane creature has adopted the wierd habbit of placing both hands in front of his mouth and making a loud animal-like hooting noise. What is the big idea? Is he seeking accomadation at Tarronga Park or Gallam Park? We certainly do not want him here at Telopea Park unless he can cure himself.

The affliction seems to manifest itself most severely during English periods when Mrs Cruise is conspicuous in her absence. He just sits at his desk and hoots with all his strength while horrified members of the class look on from all parts of the room. It is sincerely hoped that this disease is not contagious. Imagine the whole class hooting at once, what a horrid thought!

STRANGE SIGNS SIGHTED AROUND SCHOOL.

Over the past week several signs with highly unusual captions have been sighted around the school, particularly in Room I3. When the person responsible, David Howe, was questioned by a (CPC) representative, he stated that he had found the said signs lying by the roadside on his way to school. He also said that he would post them "wherever possible" around the school. (CPC) NEWS.
